

Flexlight Perform 832

We at Fabspace hangars only work with the best materials. Therefore we use the best available membrane product by Serge Ferrari for our hangar solutions.

SF is world leader in flexible composite material technology, provides expertise and products to help us to design ever-innovative projects. The lightweight, durable and recyclable solutions meet the functional and aesthetic requirements of sectors as diverse as building and industry.

Major advantages

- High dimensional stability due to Precontraint® technology
- Excellent UV resistance
- High coating thickness for higher abrasion resistance
- Low wick treatment (832-8100)
- Any colour upon request
