HANGARS

ROM PRICE LIST  
**V\_series**  
2024

## V\_series

Although individuality is part of our philosophy, we created several standard types between 250 m<sup>2</sup> and 3000 m<sup>2</sup>.

The core of our V\_series is a static-calculated galvanized steel construction covered by a high-quality membrane. It resists wind speeds of up to 150km/h or more, snow/sand load up to 150kg/m<sup>2</sup> and also earthquake-proofed.

Fabspace mobile hangars can be fixed on any type of ground and can be equipped with a wide range of extras, such as HVAC, fire detection and protection systems, solar panels, office areas, cranes and many more. For perfect delivery conditions every hangar part fits in standard 20' or 40' containers.

Fabspace hangars are quickly produced and ready for operation.

## pricing details

included

- personnel door
- foldable membrane gate
- cabling/LED lightning
- standard colour membrane
- 5 years warranty

excluded

- delivery to construction site
- HVAC
- warranty extension
- extras

basic price depending on more specific information

Our V\_02 version is designed to accomodate most light to medium sized helicopters and small airplanes, e.g.

- H125, EC135, EC145
- AW109, AW169
- Bell 429
- MD 500, MD 900
- Learjet 45
- Citation M2

# Flexlight Perform 832

We at Fabspace hangars only work with the best materials. Therefore we use the best available membrane product by Serge Ferrari for our hangar solutions.

SF is world leader in flexible composite material technology, provides expertise and products to help us to design ever-innovative projects. The lightweight, durable and recyclable solutions meet the functional and aesthetic requirements of sectors as diverse as building and industry.

## Major advantages

- High dimensional stability due to Precontraint® technology
- Excellent UV resistance
- High coating thickness for higher abrasion resistance
- Low wick treatment (832-8100)
- Any colour upon request

## Standard colours

RAL 7038  
832 - 1071

RAL 7037  
832 - 1070
